John Rimuel Bigata

Data Engineer @ Macquarie | Data Engineering, AI driven
Development, Responsive Web Design, Data Integration, Data
Analytics, Python, Flutter app development, Flutterflow
Makati, National Capital Region, Philippines

Summary

I'm a passionate Data Engineer and Integration Specialist with experience in data analysis, automation, and technical support. Currently working as a Data Engineer at Macquarie, I specialize in building and maintaining ETL pipelines, troubleshooting data issues, and collaborating with cross-functional teams to deliver efficient and scalable solutions.

My background includes freelance work as a Mobile App Developer, where I developed and optimized applications using Flutter, PHP, and JavaScript. This has strengthened my problem-solving skills and adaptability in fast-paced environments.

I'm proficient in SQL, Python, Snowflake, Power BI, Talend Studio, and DevOps tools like Git and GitHub. My experience with platforms such as Salesforce, Workday, and ServiceNow has allowed me to bridge the gap between business needs and technical solutions effectively.

Driven by a commitment to continuous learning and growth, I'm excited about leveraging data and technology to create meaningful impact. Let's connect and explore opportunities to innovate together!

Experience

Macquarie Group
Data Engineer
July 2025 - Present (11 months)
Makati

As part of the Data DevOps team, I will work closely with cross-functional teams to deliver reliable and scalable data solutions. I will:

Collaborate with product owners, analysts, and development teams to understand requirements and translate them into effective data solutions.

Design and develop test plans, test cases, and scripts to validate data accuracy, completeness, and consistency.

Build and maintain scalable ETL pipelines and data workflows using tools such as Control-M and dbt.

Develop data models, reports, and dashboards to support business decision-making.

Optimize SQL queries and tune database performance for improved efficiency and speed.

Provide support by responding to and resolving escalated operational issues, participating in on-call rotations and scheduled support shifts.

Contribute to CI/CD processes, version control, and automation efforts to streamline development and deployment workflows.

Through this role, I aim to help ensure high data quality, system reliability, and support the business in making data-driven decisions efficiently.

Accenture

Associate Software Engineer

March 2023 - July 2025 (2 years 5 months)

Manila, National Capital Region, Philippines

At Accenture, I worked as a Data Engineer Associate, providing Talend Integration support by handling ServiceNow incident tickets, monitoring jobs, and troubleshooting integration issues. Collaborated with cross-functional teams, including Salesforce, Workday, and Profisee, to resolve data-related challenges and improve workflows. Additionally, I contributed to ETL development, enhancing and debugging Talend jobs to ensure smooth data transformation.

GoPlus OPC

Mobile Application Developer

September 2022 - December 2022 (4 months)

Lucena, Calabarzon, Philippines

At GoPlus OPC, I developed mobile applications using Flutter (Dart), PHP, and JavaScript. Collaborated with designers and developers to build high-quality apps.

Samgyup ng Tropa

Graphic Design Intern

April 2022 - July 2022 (4 months)

Lucena, Calabarzon, Philippines

Education

Dalubhasaan ng Lungsod ng Lucena

Bachelor of Science - BS, Information Technology · (June 2018 - August 2022)

CVE Colleges, Inc

High School Diploma, Information and Communications Technology · (June 2016 - April 2018)
